

COMPASS BY GETTHERE

Overview

Designed to empower travel managers and travelers of all organizations, Compass by GetThere offers an affordable yet sophisticated technology platform to book employee corporate travel online. Our continually enhanced traveler interface makes booking for business as simple as booking a leisure trip, and as personal—all wrapped around Tower's progressive travel management services.

Traveler Benefits

- **Ease**—Advanced, intuitive interface requires little or no training
- **Convenience**—Book air, car, and hotel reservations online, 24 x 7
- **Empowerment**—Choose from the industry's widest selection of travel options

Travel Manager Benefits

- **Automation**—Frees travel manager to focus on more strategic objectives by automating basic travel reservation and meeting planning processes
- **Control**—Increased policy compliance from travelers, ensuring your travel spend is under control and your travel program is a success
- **Flexibility**—Easy integration with Tower's multiple GDSs, as well as internal company systems

Company Benefits

- **Compliance**—Ensures travel reservations comply with corporate policies
- **Cost Savings**—Fewer agency fees, access to lower fares, and increased use of preferred suppliers and negotiated rates
- **Efficiencies**—Integration with other enterprise-wide systems streamlines procurement operation and drives efficiency
- **Relationships**—Policy compliance means more bookings for preferred vendors, enhancing supplier relationships and increasing negotiating power

Compass by GetThere Key Features

- Easy access to air, car, hotel and rail reservations 24/7
- Award-winning, easy-to-use leisure interface
- Travel policy and preferred supplier compliance
- Flexible integration with enterprise systems

Putting the Pieces Together to Support *Your* Needs!

Compass by GetThere Features

Compass by GetThere is an affordable yet sophisticated technology platform offering a proven track record of savings and adoption success for your organization. Employees and travel managers can book and manage travel online with an easy-to-use interface and friendly functionality.

Highly Integrated Content

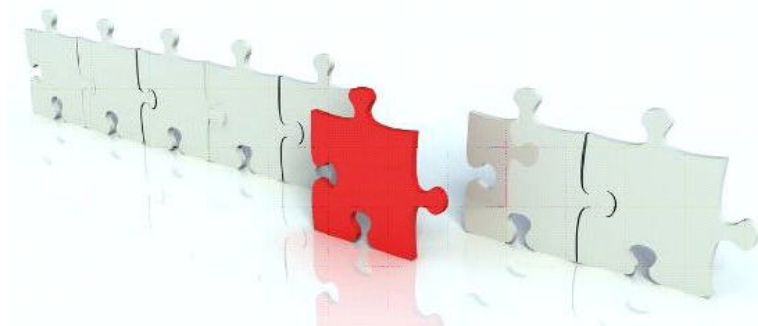

- Access Inventory from Multiple GDSs—Using Super PNR technology you can view flights in multiple reservation systems
- Web Connect Technology—Access more than 50 online travel sites and a wide variety of global content sources
- Rail—Seamlessly manage and book rail online, including Amtrak throughout the Northeastern US, VIA Rail in Canada, The Trainline in the United Kingdom, and SNCF in France

Easy-To-Use Traveler Features

- Leisure-like User Interface—Offers air, car, hotel and rail from a single home page and is easier than ever to use, like the popular leisure travel sites
- Online Ticket Exchange—Travelers can void, refund, and exchange their tickets online
- Hold Trips—Reservations can be held easily in the GDS prior to booking
- Pre-Trip Approval—Every travel booking can be reviewed in advance for manager approval
- Flex Date Search—Travelers can find the best priced itinerary when they can be flexible with their outbound or return travel dates
- GroundNetwork—Reserve limos, sedans, and taxis online

Only Fully Integrated Meetings Tool

Tower's robust meetings tool is now available as an integrated feature of Compass by GetThere. The Tower DirectMeetings product handles meeting invitation and registration, cost tracking and reporting, site selection and more. With Tower DirectMeetings, all meetings related travel booked online flows through Compass generating additional company savings.

Compass by GetThere Key Benefits

- **Company Cost Savings**—Lower service fees, access to lower fares, and increased use of preferred suppliers and negotiated rates
- **Travel Manager Control**—Increased policy compliance, ensuring your travel spend is under control and your travel program is a success
- **Traveler Added Value**—A familiar, easy, leisure-like online shopping experience combined with “all the extras” including dining, activities, and events
- **Travel Arranger Flexibility**—The ability to easily book, manage and track multiple traveler itineraries online and in real-time
